

PRESS RELEASE

review FachPack Nuremberg

Wilhelm Bahmueller GmbH gives a positive summary after successful trade-fair appearance on FachPack in Nuremberg

From 29 September to 1 October Wilhelm Bahmueller GmbH exhibited at the Nuremberg FachPack fair where numerous trade visitors could be counted at the joint booth of Bahmueller and Goepfert within the packaging machinery in hall 9.

On 75sq novelties such as the Topmatcher were presented, which - combined with the specialty folder gluer TURBOX - is able to create more cost effective and more innovative packaging solutions by fiber saving and combining different substrates. On-screen presentations and packaging samples allowed to show the operating mode of the machinery in an optimal way. Among the flagship TURBOX Bahmueller informed also about in-line machines which are placed on the market under the name BGM Bahmueller Goepfert Maschinen GmbH. At the booth's rear side an impressive banner (2,5m x 7m) with Klingele's CL 13/32 acted as an eye-catcher and therefore attracted lots of visitors. Against one's expectations the interest of the manufacturing sector on semi-automatic machines was also intensely high.

Bahmueller's representatives were highly pleased about the visitors' response: numerous people could be welcomed, informed and serviced by typical swabian dishes. "In summary we would like to say that we got lots of positive inputs from the industry and are pleased to see a stimulation of the market", stated Ulrich Wolz, sales manager Wilhelm Bahmueller GmbH.
