

PRESS RELEASE**Bahmüller & Göpfert at SuperCorrExpo in Atlanta, GA**

For four days, October 1st - 4th, 2012, Bahmüller & Göpfert presented themselves under the mutual corporation BGM at the Georgia World Congress Center in Atlanta. The mostly North American participants could learn about the Turbox II innovations, the all new POWERPACKER II, as well as the semi-automatic machine spectrum of gluers, stitchers and tapers, which has been an industry staple for many years. In particular, independently owned box manufacturing companies showed great interest in the product offering. The number of visitors were fewer than four years ago at the same event, but the quality of interest was very good. People clearly were well prepared to discuss specific machinery and system requirements that need solutions. Noteworthy also was the participation of Latin American box makers for which we could identify some lucrative opportunities for the immediate future. The specially designed 30 year BGM anniversary beer mug found much interest among the visitors and literally flew off the stand.

Based on the quality of projects identified, a significant increase of business for Bahmueller is expected for the coming year in North America.

The next SuperCorrExpo is scheduled for October 17 – 20th, 2016 in Orlando, FL.
