

PRESS RELEASE**First TURBOX workshop „BEST IN CLASS“**

The first TURBOX workshop took place at Bahmueller premises on 21 and 22 January and was especially well received by some 30 interested TURBOX operators. Even the redesigned conference room was bursting at its seams.

In the meantime more than 20 TURBOX specialty folder gluers have been installed all over the world which were developed from the beginning in close cooperation with machine operators. Therefore those were invited to join the first TURBOX operator workshop and to learn more about innovations as Feeder, Prefold and Topmatcher as well as the new Boxflow® control generation. They were also given lots of tips n tricks regarding the optimization of set-up times. Besides the exchange of experiences Bahmueller appreciated receiving information about the current and prospective market requirements.

With its slogan “BEST IN CLASS” Bahmueller has the aim to achieve further improvements in the process of making folding boxes by cooperating with its users. The new generation TURBOX 2010 is the result of experiences gained from Bahmueller’s costumers and includes the forceful realization of their desires and suggestions after the development of the first TURBOX generation in 2006. Innovation in dialogue with the costumer achieves sustained success.

To conclude the successful event on Friday evening the participants were invited to a special guided tour through the TURBOX’ home and city of Gottlieb Daimler in Schorndorf where even persons of past times came alive.

Due to the strong interest the workshop is to be continued in autumn 2010.
